

HARD-PRESSED CIDER CHERRY

We use fresh pressed apple juice from apples grown in Southwestern Michigan for our hard ciders. Using Michigan grown fruit and high quality ingredients helps create the clean, fresh, and natural flavored ciders that consumers desire. Following the fermentation of the fresh apple juice, we add our local fresh pressed Balaton tart cherry juice. Balaton cherries are the sweetest variety of the tart cherry family. The natural tart sweetness gives the cherry cider a fresh natural cherry flavor that will make you mouth water and crave another sip.

NOSE & PALATE

You will find fresh tart cherry followed by light notes of baking spice. The finish leans toward the drier side with a crisp refreshing slightly tart finish. The palate has an unmistakable flavor of a Michigan tart cherry.
